PROTECTING WHAT WE VALUE.

Our conviction: Protection
can be so beautiful

32 **WE LOVE WHAT WE DO**

The magic is in the detail

44 **WE ♥ DESIGN**

For your beautiful home

66 **MAKING THE GOOD BETTER**

Indoors like outdoors, outdoors like indoors.

“EVERYTHING WE VALUE DESERVES OUR PRO- TECTION!”

Protecting what we value. Indoors like outdoors, outdoors like indoors. Your own home just as much as your workplace or home office. This is what our KADECO brand stands for. We can now look back over 30 years of successful corporate history, during which we have grown steadily from our roots in the interior design industry. We will continue to be passionate about sophisticated technology and attractive design in the future too.

With a tradition of innovation and based on decades of experience, we are constantly developing - and optimising sophisticated products right down to the last detail. As a consequence, we already expanded our range to include erwilo awnings in 2006 and have incorporated them into the KADECO brand in 2021. Today, we are reliable partners, combining a comprehensive, full range of indoor and outdoor privacy, sun and glare protection systems. And the most valuable recognition is and will remain the trust of our customers throughout the world.

Classic pleated blinds

PRIVACY SHIELDS AND SUN PROTECTION AS INDIVIDUAL AS YOU

Show off your attitude to life - and design an inspiring atmosphere with classic pleated blinds by KADECO. Sophisticated operating and installation options ensure optimal privacy and sun protection for any shape of window. For these free-hanging and tensioned pleated blinds, you can choose clamp mounts on the casement or adhesive strips in the glazing rebate, for example, which can easily be attached and removed without a trace. This way there is no need for drills and screws and you avoid unsightly holes in the window frames.

LIVE YOUR STYLE

Have you fulfilled your architectural dream - and want something more than the standard solution for your windows too? Thanks to bespoke special shapes from KADECO you can ensure high-quality privacy shielding and sun protection even in unusual situations.

Trapezoid? Hexagon? Ceiling system? Thanks to versatile options, you can operate our perfectly finished pleated blinds even in places that are difficult to reach. The huge choice of over 300 different fabrics and colours allows you total design freedom.

Honeycomb pleated blinds

THE MOST BEAUTIFUL WAY TO SAVE ENERGY

Bees are gifted master builders. They create their honeycombs with fascinating precision - providing the perfect model for our honeycomb pleated blinds. Thanks to two connected layers of fabric, the punched holes and cords are elegantly concealed. Moreover, due to the internal, insulating air pockets and high reflection, you save energy in the most beautiful way.

Generally:
Sound absorbing

In winter:
Thermally insulating

In summer:
Heat reflective

YOUR INDIVIDUAL STYLE
AT THE WINDOW

Warmer in winter, cooler in summer: with our honeycomb pleated blinds you are opting for genuine energy savings and perfect privacy and sun protection. Honeycombed air pockets insulate your room against the heat or cold and provide acoustic peace and quiet by absorbing sound. Both the tensioned and free-hanging versions of these unique pieces of fabric design can be installed without screws inside the glazing rebate or on the casement - leaving no trace behind when you move out of the property.

MOTION

SMART WELLBEING ZONES

Do you love your freedom? Regardless of whether you are sitting on the sofa, on the go or on holiday? Make your home even smarter with the MOTION motor drive programme - and control your sun protection simply with a remote control or app. Make yourself as comfortable as possible - and transform your home into a true oasis of wellbeing with the tip of your finger.

YOUR CONVENIENT SOLUTION

How smart do you like it? Thanks to MOTION, you have the choice between a wide range of convenient operating options which all fit perfectly into your personal smart home experience. You can move your system into the required position conveniently from your sofa or desk by remote control or voice control using Alexa, Apple Siri or Google Assistant. If you like to be out and about a lot, you can also bidirectionally control and program your privacy and sun protection with the help of the MOTION app - whenever and wherever you are in the world. And if you don't happen to have the remote control or app to hand, that's no problem either: you can easily operate your motor manually by simply pulling the chain. Moreover, MOTION is compatible with the Mediola smart home system and soon also with Apple HomeKit.

RELAXING TIMES

Trust in classic roller blinds and the sophisticated technology of compositions with creative fabric designs for optimal glare protection and privacy. Relax and opt for innovation and hand-crafted perfection: discover bespoke millimetre-accurate solutions ranging from large panoramic windows to sloped rooflights. Choose from more than 350 high-quality fabrics and designs to add another special touch to your design individuality.

TRUST IN THE CLASSICS

May we present? The classic roller blind. This is where sophisticated technology and high-quality fabrics combine aesthetics and functionality to make a design classic. You can also enhance the ends of your roller blind attractively with magnetic metal covers in six different colours. A stylishly confident appearance. Because classic roller blinds with versatile installation options, a maximum width of 3500 mm and maximum height of 3400 mm are so impressive, they suit any window or living situation.

Vario roller blinds

FOR SPECIAL LIGHT EFFECTS

Your evening after work can be so lovely and varied: Vario roller blinds create impressive effects by playing with the light and graphic patterns. You have a choice of almost 100 fabrics in various colours, designs and textiles.

Two lengths of fabric, which are placed one in front of the other and feature alternating transparent and opaque sections, provide decorative and effective protection against glaring rays of sunlight.

Thanks to sturdy installation clips, the roller blinds can easily be positioned where you need them on the wall or ceiling using a carrier profile or protective cassette. This makes them suitable for either wall or ceiling installation. A shaft with smooth-running chain pull allows you to position the height of the drape wherever you want it for optimum control of the light entering the room.

USE YOUR FREEDOM TO CREATE

Minimalism in its most beautiful form: clean lines and pure forms bring the elegant materials and colours of the ClassicLine, SlimLine and FreeLine versions to the fore. The subtleties of the sophisticated panel tracks lie in the operating options: you have a choice here; both ClassicLine and SlimLine versions can either be drawn freely or moved with a cord pull or operating rod. FreeLine technology combines purist design with superior functionality. With conspicuously elegant aluminium rails on the wall, below the ceiling or front mounted, this version creates visual accents in the room.

GIVE YOUR SOUL A BREAK

Everyday life is often hectic. All the more reason to enjoy those precious moments of peace and quiet. Preferably in a relaxed atmosphere, of course. Create your haven of peace with the help of high-quality panel tracks - even if you have large glazed areas.

THE MAGIC IS IN THE DETAIL

We love what we do - and always have a definite goal in mind - to bring our customers more joy. Greater quality of life and comfort. And greater protection for the things they value. To make their ideas of a unique home or pleasant workplace a reality, we strive for superior quality and handcrafted perfection. For us, this does not mean mindlessly switching machines on. Quite the opposite: for us, the magic is in the detail. We fulfil the "Made in Germany" quality seal out of the deepest conviction and consider it to be an aspiration for high quality, durability and harmony between form and function.

So that we can achieve this, we focus on sophisticated privacy and sun protection systems and hand-made unique pieces which are as individual as our customers' homes. We are enthusiastic about the little subtleties which ultimately come together in a perfect symbiosis. We think ahead and outside of the box, making the good even better - and turning home and work environments into something quite special.

PERFECT INTERACTION

The whole is more than the sum of its parts: this also applies to the interaction of know-how, passion and instinctive flair which the KADECO family demonstrates over and over again. Because behind every privacy and sun protection system there are creative minds with an excellent eye for fabrics, colours and designs. We think ahead in a refreshingly different way, we are idea generators and trendsetters,

problem solvers and the fulfillers of dreams. Thanks to our attention to detail, our dedication and passion, we create unique, made-to-measure pieces which make our customers happy. The individual work steps literally go hand in hand along the way: from technical development and visual design to manufacture. What makes us especially proud in this context are the many employees who have been loyal to us for decades - and are therefore an integral part of the KADECO family.

STRONG REGIONAL ROOTS

As an owner-managed family business, we feel a particularly strong link to our home region of East Westphalia. This is reflected in trusting and long-term business relations and friendships, but also in our social engagement. To support coexistence amongst people in the area, we consider it our duty to get involved locally and offer our support where it can be effective. We work with sheltered workshops in the region, for example, offering the best possible inclusion and integrating people into working life. We also show our faces at local clubs, schools, nurseries and cultural events in order to protect what everyone values: the community. When it comes to social responsibility, subjects like sustainability, climate and environmental protection also play a crucial role, of course. Because the future of our blue planet is particularly dear to us, we are dedicated to an alternative to the throwaway society. This includes environmentally

"WE MAKE
THE GOOD
BETTER.
AND IT
LASTS
LONGER
TOO!"

WE LOVE SUSTAINABILITY

friendly production just as much as the use of renewable energy sources. This is demonstrated, for example, in the textiles we use, which meet the most stringent requirements for low-pollutant quality. We are one of the first companies in the industry to start using recycled fabrics in our Level Green collection, which stands for the careful and sustainable use of materials and resources. The production of our Nola wooden Venetian blind range is also environmentally friendly: as verified by the world-renowned FSC® certificate, we have opted for the responsible handling of forest resources. This means we are making a contribution to managing forests and plantations for a healthy future, maintaining biological diversity. And that is not all:

we also bring the notion of sustainability to life by using green electricity. The same applies to our new powder coating facility where we recycle the wastewater directly on site. For the environment - and for the future of our planet.

Felt Venetian blinds

IN PEACE LIES STRENGTH

Try a bit of cosines, peace and cosiness...! Perhaps you are already familiar with the Danish route to happiness? Hygge represents a quite special attitude to life – and allows dreams to come true. Coordinate our high-quality designer felt Venetian blinds in four wonderful colours to suit your home and find a bit of Hygge for yourself. The easy-care material also improves room acoustics and pleasantly reduces the noises around you thanks to its composition.

Made for you

THE PERFECT VIEW

The first warming rays of sunshine in the morning. The evening sun as it bids farewell below the horizon. To adjust the amount of light entering the room to suit your preferences, you can easily raise or lower the high-quality slats using the convenient chain pull. If you want more colour in your life, choose our Living Stripes which give you almost inexhaustible design options thanks to a selection of over 130 colours. The magic touch is the FlicFlac technology which allows you to move the slats into the required position easily with a slider - lending a unique atmosphere to your room.

Vertical blinds

YOUR IMPRESSIVE LIGHT EFFECTS

Regardless of whether vertical or horizontal, linear or curved: with highly flexible vertical blinds from KADECO you can enjoy the positive effects of daylight - without having to forego your privacy. Use them to create the ideal atmosphere for focusing on your work in the office, home office or enjoying time at home.

Using a computer-aided bending process, the guide rails are matched to the radius of the structural conditions so they fit with millimetre accuracy to the unusual architecture as vertically or horizontally curved vertical blinds. The system can be raised and lowered easily and angled flexibly by chain and cord operation or with an electric version.

ALL-ROUND SUCCESS!

Whether in bay windows, gables, under archways or in front of semi-circular or round, vaulted windows: show off your artistic side - and create your own personal feel-good place from over 250 different fabrics and colours.

WE LOVE WHAT WE DO

Our driving forces are the heart and soul and the passion that we pour into our products and developments. We love our work and put this claim into practice right down to every tiny detail. The sense for trends is buried deep within our corporate DNA just like the enthusiasm for beautiful design and innovative technology. This is how we come up with bespoke products - and more enjoyment in your life. The lovingly curated collections are based on the creativity of our skilled textile designers. With our own design ideas and inspired by trends, we develop exclusive fabric designs and patterns in stylish KADECO creative designs.

We curate fascinating themes for every type of interior design style with a rich and stylish selection in our collections.

WE ♥ DESIGN

We love design and put this motto into practice every day in every tiny little decision. And pursue our extraordinary KADECO design spirit. This passion is also reflected in the tiny details such as the development of filigree designer motifs or the composition of colour nuances. For us, design always goes hand in hand with product development. Because combining beautiful and

aesthetic embellishments with functional and user-friendly technology - that is what we are synonymous with. It is precisely this unbeatable combination that ensures perfect and individual privacy, glare and sun protection that makes us incomparable.

FRESH FROM OUR STUDIO: YOUR DESIGNS

Good design attracts attention. It stirs up emotions, touches you and moves you. Our attention to detail in terms of quality and design makes the difference.

This is why we leave nothing to chance in the design department and often grab a paintbrush or pencil ourselves so that new patterns meet your and our aesthetic expectations. We place a lot of value on our

"BEAUTIFUL DESIGN IDEAS FOR YOUR HOME."

Margaretha Runksmeier, Creative Director

Shutters

THAT HOLIDAY FEELING AT HOME

Summer, sun, sunshine: interior shutters exude Mediterranean flair and bring that holiday feeling home. The elegant, genuine wooden interior shutters combine meticulous craftsmanship with superior quality. Your characterful privacy and sun protection is suitable for rectangular windows and angles, triangles and arches alike.

TIMELESS AND STYLISH

No matter which of the 60 stains or solid colours you select, shutters blend superbly well into your décor - from Scandinavian flair to a colonial style. Depending on which style you chose - and whether you decide on 47 mm, 63 mm or 89 mm wide slats.

OUTDOORS

ENJOY MORE TIME OUTDOORS

Take a seat! Enjoy the beautiful summer's day. Totally relaxed beside your loved ones and perfectly protected from the sun. Even our entry level model - the open patio awning - allows you to create a real oasis of wellbeing. And an optional protective cover shields your high-quality awning from the elements such as rain.

OPEN FOLDING-ARM AWNINGS

The quality is in the detail: with our design awning 110 you can linger serenely under a perfectly finished solution made from high-quality aluminium. A round projection profile cleverly picks out the statement style of the system and is connected with sturdy folding arms.

Which would you like? Your awning fabric either extends conveniently using a motor drive or manually with the help of a crank. Regardless of which version you choose, the elegant awning generously shades an area up to seven metres wide and four metres projection.

Cassette awning 360

ALWAYS PERFECTLY PROTECTED

Durability, longevity - and perfect protection: our cassette awning 360 sets quality standards. Its unique aesthetic features a slimline, oval cassette with gleaming high-quality aluminium sides. The brush seal minimises the ingress of dust, dirt, leaves and insects so you can relax underneath your awning all year round. The awning fabric can be extended using a smooth-running crank or via an app if you like things to be exceptionally convenient. This means you can move your awning to suit you - whenever you want to and regardless of where you are.

A modern outdoor patio area featuring a large, brown, retractable cassette awning. A man and a woman are walking hand-in-hand on the left side of the patio. In the center, there is a dark blue outdoor sofa and a matching coffee table. The patio is surrounded by greenery and a clear blue sky with light clouds. The overall scene is bright and inviting, showcasing the awning as a key feature of the outdoor space.

Cassette awning 380

THE NEW
CENTREPIECE
OF YOUR
PATIO

AESTHETICALLY BEAUTIFUL

Make an impact with our latest model, the cassette awning 380. It creates elegant accents which fit in well with the modern cubist style of architecture. With a maximum size of 7 x 4 metres, this awning is excellent for shading large areas. It has innovative LED folding arms which will show off your patio in a perfect light.

If the low sun should still dazzle you despite the awning being extended, you can lower an electric valance on the projection profile at the touch of a button.

AN OUTDOOR FEELING ALL YEAR ROUND

Enjoy the spring sunshine together, eating, laughing and relaxing together. When the sunshine gains strength, conservatory awnings from KADECO can block the radiation before it passes through the glass. Create visual accents in your personal oasis of wellbeing using the extensive choice of fabrics.

Externally mounted awning 520

KEEPING A COOL HEAD

Want to enjoy the sunshine - but still keep a cool head? With the help of our externally mounted awning 520, you can protect your favourite place from rays of sunshine and maintain a pleasant temperature even in summer. Thanks to maximum measurements of five metres width and six metres projection, these awnings are ideal for shading especially large areas. The perfectly tensioned fabric extends along sturdy aluminium guide rails. Protection is provided by the remote control with sun and wind sensors which automatically extend and retract the awning depending on the strength of the sun and wind or if it rains and you don't happen to be at home.

"THE SUBJECT OF SMART HOMES IS HIGHLY TOPICAL AND ESPECIALLY EXCITING."

Gordon Bucksch

MAKING THE GOOD BETTER

KADECO is synonymous with unique quality - and the perfect interaction of design and functionality. For us, it is both an aspiration and an obligation to develop products which inspire as much through their fabrics and designs as through their technology and user-friendliness. In order to do justice to this holistic approach, superior material quality and perfect craftsmanship are particularly close to our hearts. These high expectations set us apart - and pay dividends for our customers too. Because we opt for high-quality materials such as powder-coated aluminium and stainless steel right down to the tiniest details, our products prove to be especially durable. A decision in favour of KADECO is therefore always a decision in favour of extraordinary and lasting quality. Our objective of a long service life is proven among other things by endurance tests, which demonstrate the reliably long service life of our privacy and sun protection systems.

Gordon Bucksch leads technical product development at KADECO and drives innovations in indoor and outdoor sun protection forward with his team.

WE'RE INSPIRED BY INNOVATION

Traditionally innovative: at KADECO, we rethink things and think ahead - and bring this philosophy to life day after day. This innovative capacity also involves continuously improving existing solutions to make them as convenient and user-friendly as possible. It is the functional components that play an important role in this connection. Because we pay special attention to the needs of our customers at all stages of development, we make it easier for them to install interior privacy and sun protection systems using adhesive kits without drills and screws, for example. The aim is to continuously improve existing, tried and tested products and thereby simplify the everyday lives of our customers. This customer-focussed approach is also reflected in our automation solutions which are impressively easy and convenient to operate. A good example of this is the MOTION range of motors from KADECO, which can be combined with numerous technical systems. This enables

customers to control their privacy and sun protection by voice command and connect devices with each other.

TURNING WISHES INTO REALITY

More comfort. More user-friendliness. More progress. As a driver of innovation, we want to lead the way and show our industry, but also customers, what is feasible. For us, this means covering the whole bandwidth and offering customers from entry level to the premium segment consistently high-quality and attractively priced solutions. Thanks to this wealth of different versions, we give customers a wide scope for design - and the chance to actually turn all their wishes into reality.

TIME TO EXPRESS YOURSELF

Your garden is flourishing. The lawn is freshly mown. Your family is relaxing on the patio. With a freestanding awning you can enjoy beautiful days to the full. With the best view and perfectly protected from the sun.

CONTEMPORARY SUN PROTECTION IN A CLASSIC STYLE

Top functionality, perfectly tensioned: The textile patio roof 615E radiates elegance and allows you to enjoy wonderful moments outside. Thanks to the huge selection of fabrics and exclusive colours and materials, you can aptly express your own personal style.

The 615E makes it big on your summer terrace. Slender supports and lateral guide rails ensure extremely high stability up to six metres projection. Thanks to its high wind stability, it is also suitable for cafés and restaurants.

What could be better than meeting friends, eating, having a drink and spending a few joyful hours outdoors? The exclusive pergola from KADECO offers perfect protection from the sun and rain and is suitable for the home, restaurants, cafés and beer gardens - and won't thwart your plans even when it is windy and rainy thanks to the water-repellent fabric.

Pergolas 690

IT'S ALWAYS THE
OUTDOOR SEASON

PROTECTION AGAINST THE SUN, WIND AND WEATHER

Top quality. Top comfort. Top functionality. We combine our objectives to provide an optimally protected ambience inside an extremely stable structure in the Pergola 690. A high-quality ZIP screen, which you can add to the front and sides of your pergola, allows you a perfect view of the outside. It protects you from the wind and dazzling evening sun.

No matter whether it is fixed to the wall or ceiling or is free-standing and simply fixed to the foundation: you will be on the safe side in any weather conditions with this stable pergola.

CLEAR VIEW OF THE OUTSIDE FROM INSIDE

Drop-arm awnings 790

It's finally the end of the working day. You're finally at home. It's time to relax next to your large glass façade. Our drop-arm awnings protect you perfectly from the sun even on hot days - and ensure an indoor climate that will make you feel good.

You can extend your window awnings up to 135° so they protect you from the sun but you still have an unobstructed view of the outside. As a practical and contemporary shade for your patio you can also comfortably control your semi-cassette awning 210 via a smartphone or tablet.

TAKE SOME TIME OUT AT HOME

Create your personal retreat and take time for those things big and small that make life so worth living. Make your life simply more comfortable with our classic vertical awnings. They keep harsh light and heat out – giving you the gift of untroubled times within your own four walls. You have a choice between the ZIP guide for exceptional wind stability and the discreet rope guide which exudes lightness.

SOMFY: THE MOTORISED SOLUTION FOR GREATER COMFORT

Digitalisation is revolutionising the planet and the world of awnings. Thanks to intelligent home technology from Somfy, you can easily control your awning from your smartphone or tablet - wherever you happen to be.

It can either be operated decentralised by hand-held transmitter or from a central control system, which you can equip with timer programmes or sun monitors. This means you have perfect ease of use and top security - and even save energy!

UNOB- STRUCTED VIEWS

Make your home into something quite special - and opt for the unique technology of our ZIP vertical awnings with an exceptional view of the outside. This is done by guiding the fabric along sturdy side profiles on both sides using the zip principle, leaving no gaps. The optimum tautness of the fabric ensures that no creases form and it is left unfazed even by force 6 winds when extended. Because our vertical awnings filter sunlight perfectly, they enable you to have softly balanced daylight in your rooms whilst maintaining a view of the outside.

SUN PROTECTION INSTEAD OF AIR CONDITIONING

At home, in your home office or at work: our ZIP vertical awnings give you a sense of security - wherever you happen to be. These purist awnings enable seamless integration into the façade and are suitable for shading especially large areas thanks to various cassette sizes. This means the awnings can also protect the workplace optimally from excessive sunlight, glare and heat.

These ZIP awnings can also be integrated into any building automation system such as KNX BUS so that only those areas of the façade that are exposed to direct sunlight are shaded. In the best case scenario, active cooling will no longer be needed as a result of the combination of shading and optimal use of daylight.

A HISTORICAL TOUCH

Timeless, durable, sturdy and always something special: the scissor arm awning 186 by KADECO isn't just eye-catching! Hardly any other awning is better suited to historical façades or for shading large areas - for example restaurants.

No matter whether for cafés, restaurants or bars: our impressive, made-to-measure scissor arm awnings feature quality right down to the last detail, allowing guests to spend hours in the fresh air with minimum fuss. On request, your classic awning can of course also be supplied with a practical radio-controlled motor.

OUR CURRENT RANGE OF COLOURS: 20 STANDARD PROFILE COLOURS

A personal choice of colours from the entire RAL chart can also be produced. The colours are available in microstructure, gloss and matte finishes.
